Summary

AI and Data Science-focused student with skills in designing and developing full-stack, user-centric software applications, applying data-driven logic, and efficient algorithms. Committed to clean code, problem-solving, continuous learning, and scalable, reliable software solutions.

Skills

Technical: Java, Powershell(Basic), JavaScript, HTML, CSS, React.js, Node.js, Express.js, MongoDB, MySQL

AI & Data Science: Data Analysis, Machine Learning Fundamentals, Model Training, Data Preprocessing

Tools & Concepts: Data Structures, OOP, DBMS, SDLC, GitHub, BurpSuite, Wireshark, Nmap

DevOps & Cloud: Docker, Kubernetes, CI/CD Pipelines, Linux

Soft Skills: Teamwork, Adaptability, Attention to Detail

Education

Vel Tech Rangarajan Dr.Sagunthala R&D Institute of Science and Technology Aug 2023 – May 2027
Bachelor of Technology in Artificial Intelligence and Data Science — CGPA: 8.54/10

P A Vidya Bhavan Higher Secondary School June 2020 – May 2022
HSC (Class 12), State Board — Score: 64.5%

Professional Experience

GreenSoft, Chennai (Remote) April 2025 – July 2025
Full Stack Developer – Intern

- Completed a Full Stack Development internship where I mainly contributed to front-end tasks such as building responsive web pages using HTML, CSS, JavaScript, and React. I also gained basic knowledge of backend technologies like Node.js and MongoDB. During the internship, I worked on both individual projects to enhance my technical skills and team-based projects that helped me improve collaboration and problem-solving abilities.

Projects

Floor Marking Robot *Using Arduino*
Developed autonomous line-following logic using embedded C on a microcontroller platform. Integrated IR sensors for real-time path detection and navigation control. Optimized control flow to improve movement accuracy and response time.

E-Commerce Application *Using MERN*
Hospital Management System *Using Java, MySQL, Swing*
Developed a role-based desktop application using Java Swing, JDBC, and MySQL to manage hospital operations. Implemented secure authentication and authorization for admin, doctor, and staff roles. Designed normalized relational schemas to ensure data integrity, reduce redundancy, and optimize query performance.

Portable Atmospheric Water Generator *Current*
Engineered a system to extract potable water from ambient humidity using condensation-based principles. Designed modular components for air intake, cooling, and water collection efficiency. Evaluated environmental parameters to optimize water yield under varying humidity conditions.

Certifications & Courses

- Honours Diploma in Full Stack Development (HDFD) – CSC (23-09-2023)
- EXAVERSE'24 – Web Wonder (Participation Certificate) - SRM (21-08-2024)
- Data Analytics Virtual Experience – Deloitte (13-06-2025)
- Data Visualisation Virtual Experience - Tata (23-07-2025)
- Certificate of Participation - HP (17-11-2025)

Workshops

Java Programming Workshop

Data Analytics / Data Visualisation Workshop
